# HIGH RISK CONFINED SPACE

## MOCK EXAM PAPER B

### Section 1: multiple Choice (1 mark each)

1. What type of ventilation is most effective in high-risk confined spaces to ensure continuous airflow?
  - a. Natural ventilation
  - b. Mechanical ventilation
  - c. Cross ventilation
  - d. No ventilation required
2. Which factor is crucial when selecting PPE for high-risk confined space entry?
  - a. Colour of the equipment
  - b. Compatibility with other PPE
  - c. Price of the equipment
  - d. Weight of the equipment
3. How often should gas levels be monitored in a high-risk confined space?
  - a. Only before entry
  - b. Every hour
  - c. Continuously during entry
  - d. After exit

### Answers:

1. B
2. B
3. C

## Section 2: Short Answer

- 1 . What is the role of a hole watch in high-risk confined space operations?
  
  
  
  
  
  
  
  
  
  
- 2 . List three emergency procedures that should be in place before high-risk confined space work begins.

### Answers:

1. The hole watch monitors the safety of workers inside the confined space, maintains communication and initiates emergency response if needed.
2. Clear rescue plan with trained personnel. Continuous gas monitoring. Communication and alarm systems.
